LOCTITE

It's tough to satisfy the demanding requirements of today's manufacturing buyers and engineers. At least, that's what the competitors who have come and gone over the past seven decades always say.

At Robert McKeown, we see it a little differently. Satisfying customers isn't *tough* — it's what our business is all about. The more demanding the customer, the better they like us.

Ready availability of hard-to-find electronic supplies and materials is just part of the Robert McKeown story. We also add value with our comprehensive Customer-First service offering — designed, top-to-bottom, to keep YOU running at peak efficiency, no matter what.

## *Interested in our capabilities?*

Send an e-mail to [applications@robertmckeown.com](mailto:applications@robertmckeown.com) and attach an autoCAD .dxf or .dwg file or fax a drawing, specify the materials and we will be happy to quote your application needs. We specialize in short-run and quick turn-around.

*Supporting manufacturers since 1937.  
What can we do for you?*

# We Specialize in Application Assistance for New Product Design and Existing Product Re-Design

Since 1937, Robert McKeown has helped manufacturers solve difficult design problems. At our new *ProtoFast Design Center*, we offer state-of-the-art prototyping equipment along with an engineering staff that can help you choose from a wide variety of materials and optimize production efficiency. Our staff can reduce your design costs and eliminate the expensive, time consuming process of getting prototype die cut parts with no expensive tooling involved.

## ProtoFast Design Center

Through constant investment in equipment and processes, Robert McKeown can offer world-class custom fabrication. Our new CAD X-Y programmable die cutter enables us to meet your demands for quick turnaround. Our inventory holds the newest materials from some of the world's best suppliers as well as thousands of obscure, niche products you can choose from.

## Value-Added Engineering Support

With our in-house engineering staff, it is easy for us to help you with your design needs and material selection. Send us your CAD drawings and we will produce prototypes with your materials or ours. Our understanding of agency compliance issues, material properties, and installation costs help to contribute to a cost-effective end product.

## Express Samples

Give us your drawings today and we'll give you samples tomorrow. At Robert McKeown, it's that simple.
